

ONKAR DOKE

Pune, Maharashtra, India | onkardoke9696@gmail.com | +91-7745042879 | linkedin.com/in/onkar-doke

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience in React.js, TypeScript, Node.js, and microservices architecture. CDAC-certified with a proven track record of building production-grade SaaS features, RBAC dashboards, and RESTful APIs in Agile environments. Strong understanding of responsive and adaptive UI development, cross-browser compatibility, and modern frontend frameworks. Eager to contribute to Cyncl's cloud-based 3D design platform (Spaces Flex) and grow within a global product engineering team.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, SCSS, Tailwind CSS, Redux, React Router, Responsive/Adaptive UI (Tablet & Mobile)

Backend: Node.js, Spring Boot, RESTful APIs, Microservices, JWT, OAuth, Spring Security, .NET Core (familiar)

Databases: MongoDB (NoSQL), MySQL, PostgreSQL, SQL Server, Query Optimization, JDBC

Testing: Jest (unit testing), JUnit, PSR Standards, test-driven development mindset

Architecture: SOLID Principles, Design Patterns (Factory, Singleton), NX Mono Repo (familiar), Azure (familiar)

Tools & Methodologies: Git, GitHub, CI/CD, Maven, Azure DevOps, JIRA, Agile/Scrum, Linux/Unix

PROFESSIONAL EXPERIENCE

React.js Developer Intern

Aug 2025 – Present

HT Labs (OTTplay), Pune, Maharashtra

- Built and integrated RESTful APIs for CRUD operations and dynamic data rendering within a production SaaS environment using React.js and TypeScript
- Implemented RBAC-based admin dashboards with secure, role-driven navigation flows aligned with enterprise security standards
- Collaborated with product managers, architects, and QA teams in Agile sprint cycles; participated in code reviews adhering to SOLID and PSR standards
- Debugged and resolved production issues applying JWT and OAuth security best practices to ensure high-availability frontend workflows

Frontend Developer Intern

June 2023 – November 2023

Elite Softwares, Pune, Maharashtra

- Developed responsive, cross-browser and cross-platform web applications using HTML5, CSS3, JavaScript, and Bootstrap ensuring tablet and mobile compatibility
- Delivered modular, reusable component designs within an Agile team, participating in code reviews and QA testing cycles

PROJECTS

SmartBank – Full Stack Banking Application | React.js, Spring Boot, MySQL, JWT

Jan 2025

- Architected a secure banking system with account management, high-volume transaction processing, and loan approval pipelines applying Factory and Singleton design patterns in the service layer
- Implemented JWT and Spring Security for RBAC; wrote JUnit tests; managed CI/CD-friendly Maven builds with structured Git branching and JIRA task tracking

Waste Management Platform | React.js, Spring Boot, Microservices, MySQL

Feb 2025

- Built a full-stack microservices platform with REST APIs for real-time request tracking, scheduling, and admin management integrating third-party location services
- Optimised SQL queries for high-request performance; enforced secure API access with token-based authentication and maintained data integrity across services

EDUCATION

Post Graduate Diploma in Advanced Computing (PG-DAC) <i>Centre for Development of Advanced Computing (C-DAC), Pune</i> <i>Coursework: Advanced C++, Data Structures & Algorithms, OS, DBMS, Microservices, Software Engineering</i>	2024 – 2025
Bachelor of Technology in Computer Engineering <i>G.H. Rasoni Society's College of Engineering and Management, Pune</i> <i>Eligibility: Degree completed No active backlogs Year of Passing: 2024</i>	2020 – 2024
